## Beretta Cx4 Storm Semi-Auto Carbine Rifle

• Cold-hammer forged, chrome lined 19" barrel for unparalleled accuracy
• Adjustable front and rear aperture sights
• Picatinny rail allows the user to mount tactical lighting devices

Accurate, soft shooting, and easy to handle. The Beretta CX4 Storm Semi-Auto Carbine Rifle fits into all of these categories. Cold-hammer forged barrel delivers tack-driving precision that the most veteran shooters can appreciate. This exclusive Canadian model features an extended 19" barrel. A full-length aluminum top rail for mounting optics of your choice for a custom-shooting platform. Bolt handle, ejection port and magazine release can change sides without tools for ambidextrous operation. Picatinny tri-rail extends from the fore-end that allows the user to mount tactical lighting devices. Accepts full-size Beretta 92 magazines. Includes two 10-round magazines, magazine loading tool, sight key, 3 piece tri-rail and cleaning rod. Matte black finish.

| Caliber | Barrel Length | Overall Length | Length of Pull | Magazine Capacity | Weight |
|---|---|---|---|---|---|
| 9mm | 19" | 32.1" | 13.25"-15" | 10+1 | 5.75 lbs. |

### Ambidextrous Fantastic Product

October 27, 2014

9mm purchased.
Great firearm with inexpensive ammo to ease the cost of all day shooting...
I'm looking forward to calling some coyotes in nice and close and see how it performs.
Topped it with the Vortex Strikefire Red/Green Dot mounted on the extra high mount, comes with the low mount that ends up looking through the peep...
Watch the YouTube videos to switch from right to left, you don't need a Gunsmith... Just take your time...
Remington ammo shoots great without any issue...

## Very User Friendly & Versatile

February 9, 2014

Excellent selection of accessory options but not good for optics, perfect target shooting, light weight for the wife with minimal recoil, easy to clean and dismantle, and works great in cold climates....live in a wooded area with many ravines so close range shooting is perfect...if you want to shoot greater than 200 yards in an open field, not very suitable.

## Fun accurate carbine.

January 20, 2014

I recently purchased this carbine and mounted a Bushnell 1 X 32 red dot scope on it. Went out plinking and was hitting targets from 25 yards out to 100 yards with ease.Only down side to this carbine is never leave home without your loading tool, magazine springs are very firm and without loading tool it takes quit a while to load clips to full capacity, hopefully they will lighten up with use. Reasonably cheap to shoot with bulk FMJ ammo. I purchased Hornady critical defence ammo and plan on using this carbine for close range coyote blasting along with my FoxPro call.Buy one and I`m pretty sure you`ll enjoy it as well as I have been.A little costly, the restricted version sells for under $900.00, but at least you can shoot more then just paper targets at the range.
