The Norinco M14 is a reproduction of the original Springfield M1A. Originally designed as a military firearm and issued to troops during WWII, the M14 platform is now a popular sporting rifle in Canada. Its forged receiver is an upgrade from the original cast design and its forged parts have excellent dimensional tolerances. The majority of USGI parts will drop in to the gun and work flawlessly, making this a great platform to build up.

**Specifications:****Caliber:** .308 Win.**Capacity:** 5**Action:** Semi-Automatic**Operation:** Gas, Rotating Bolt
