

**Source: Canadian Femicide Observatory for Justice and Accountability (CFOJA)
November 10, 2025**

“From December 1, 2023 to November 10, 2025, the CFOJA identified 11 women and girls killed by intimate partner gun violence in Canada. Their names are listed below.

Focusing only on victims where the method of killing/cause of death was known (N=34), **32% of victims killed by an intimate partner were shot to death.** All intimate partner violence gun-related killings were committed by male accused.

From December 1, 2023 to November 10, 2025, 326 women and girls were killed in Canada. The method of killing was not known for many victims. However, so far, we identified 48 total women and girls killed by shooting in any circumstance (i.e., not just IPV as above). As such, $48 - 11 = 37$ women and girls killed by gun violence, not in a known IPV relationship.”

Intimate partner gun violence victims list:

Year	Victim's Name	Province
2024	WIEBE, TANYA	ON
